

Aditi U Shetty

B.E. Computer Science & Engineering | RV Institute of Technology and Management, Bengaluru
Expected Graduation: 2028 | +91-8431663126 | aditushetty30@gmail.com

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++

Web & Full Stack: HTML, CSS, JavaScript, React.js, TypeScript, Tailwind CSS, SQL

Databases & Backend: SQLite, MySQL, REST APIs, Spring/ Spring boot

AI & Automation: Python AI/Voice Applications, Speech Recognition, Natural Language Processing, Agentic AI Concepts, Task Planning.

Development Tools: Git, GitHub, VS Code, Vite, Electron

PROJECTS

RaktaSetu – Real-Time Blood Donation & Management Platform

- Developed a web-based blood donation and management platform connecting **blood donors, hospitals, and donation camps**.
- Designed features for **real-time blood requests, donor eligibility, blood inventory management, donation camps, and emergency request handling**.
- Focused on improving the efficiency of blood-request management and reducing response time during emergencies.

Doctors Appointment & Billing Software

- Developed a clinic management software to digitally manage **patient records, appointments, prescriptions, medical history, billing, and clinic operations**.
- Built the application with a focus on simplifying day-to-day workflows for doctors and reception staff.
- Implemented local data management and appointment-related functionality for reliable clinic usage.
- **Currently being used by a physiotherapy clinic in Mangalore.**

AI Voice Assistant – “Jarvis” | Python

- Developed a Python-based voice assistant capable of understanding voice commands and performing system-level automation tasks.
- Implemented **speech recognition, natural-language command processing, intent detection, and task execution**.
- Designed the assistant around **agentic AI concepts**, allowing it to interpret a user's goal, determine the appropriate action, and use available system tools to complete tasks.
- Explored concepts such as **task planning, tool calling, contextual interaction, and autonomous task execution**.

CORE STRENGTHS

- Knowledge of Git, GitHub, CI/CD and Agile practices
- Quick learner with the ability to adapt to new technologies
- Strong interest in building practical software solutions
- Understanding of Open Source development and collaboration
- Understanding of Cloud Computing fundamentals
- Understanding of Big Data concepts and technologies
